2. CONTRIBUTION TO THE MASTERCLASS	
-Title	CROSS-BORDER COOPERATION AND PUBLIC HEALTH IN TIME OF SANITARY EMERGENCY
-Summary of the main contents	<p>Throughout an inductive methodology based on the example of the cross-border hospital ‘Hospital de la Cerdanya/Hôpital de Cerdagne’, this research aims to present and analyse the EU member states cross-border health cooperation in time of COVID - 19 pandemics.</p> <p>This research is approaching the horizontal issue of collaboration, rights of workers and patients, and shared competencies in the field of healthcare within the EU. We will focus on the legal analysis, taking into account Article 168 TFEU that strives to achieve a higher level of health protection through its policies and competence and combine it with the practical experience of the ‘Hospital de la Cerdanya/Hôpital de Cerdagne’. We are offering an overview of member states’ and stakeholders’ perspective on how countries became involved in this collaboration through coordinated work of a cross-border hospital, analysing staff and patient issues in times of pandemic. Did the closed border in between the counties have an implication on providing efficient health services and accessing them? This research will also look at the rights of patients from two different member states of the EU in the context of COVID-19 pandemic.</p> <p>Our goal is to present a comprehensive picture of an exemplary role model of cross border collaboration between two nations in the field of healthcare in the most difficult circumstances that modern Europe has seen, hoping to serve as an inspiration for other countries.</p>
